

Universal ColorLogic®

COLOR LED POOL AND SPA LIGHTING

One light...
changes everything.

LIGHTING

- UL listed for safe installation in virtually any niche
- 100% brighter* than any color LED light available on the market
- Spectacular color and brightness with a single light
- Uses up to 86% less energy than typical incandescent lights
- Breathtaking 10 fixed colors and 7 color changing shows
- Can be programmed to match any ColorLogic or Pentair® SAm® stand alone color shows

Total System: Pumps | Filters | Heating | Cleaners | Sanitization | Automation | **Lighting** | Safety | White Goods

The Safety of Hayward® LED Technology

Our 2-wire low voltage light is made entirely of high impact plastic with an unbreakable lens and no exposed metal components. These are all reasons why UL lists it for safe installation in virtually any niche.

The Capability of Hayward LED Technology

These lights are UL listed for safe installation in virtually any niche, including Hayward®, Pentair®, Jandy®, American®, Sta-Rite®, Purex®, Pacfab®, Swimquip® and CHD® niches. For additional information, please see our website.

Universal ColorLogic is UL listed for wall and floor installation.

For new installations, the revolutionary shallow pool niche that does not require to be bonded or grounded, allows you to further save costs on installation and materials necessary to install this light.

*Based on measured test data at time of print.
